## DETAILED ACTION

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 23-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22, of U.S. Patent No. 6,622,604. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter are the same with the subject matter as claimed in the patent. Claims 23, 24, 24 have common subject matter with claim 1 of the patent; claim 26-38, 40, 42 have common subject matter with claim 11-22 of the patent.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3731

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 23-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Hyodoh et al. (6,409,750). Hyodoh et al. disclose a method for braiding a stent inherently including all the steps as claimed (see col. 3, line 30 to col. 4, line 55; col. 34-40).

5. Claims 23, 39 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Andersen et al. (5,366,504).

In regard to claim 39 and 41, Andersen et al. disclose a braided stent. The claims are product-by-process wherein the product is not limited by the step of the process.

In regard to claim 23, Andersen et al. disclose using two different number of bobbin carriers to make the stent (figs. 6-6E).
